

Professional Monitors Product Line-up 2009

Daniel Dubreuil – 23rd June 2009

SONY PROFESSIONAL

SONY

Sony Monitor Family

- Broadcast/Professional/Medical/ViewFinder Monitors

TRIMASTER

ChromaTRU

- Public Display/Digital Signage

SONY

Sony Core Technology – What are the differences?

TRIMASTER

- TRIMASTER and ChromaTRU are the two core technologies that Sony has developed and implemented in its Broadcast & Professional Monitors range.
- TRIMASTER is a **Premium** technology implemented in the Master and Broadcast BVM and PVM Series to provide the most highest level of picture accuracy, stability and consistency.
- ChromaTRU is an **Affordable** technology mainly used in the high grade LMD Series to provide consistent quality images and colour accuracy.

SONY PROFESSIONAL

SONY

Sony Core Technology

Sony Technologies

1. Precise colour reproduction and gamma accuracy with ChromaTRU technology- Similar to CRT
2. Precise signal accuracy and smooth colour gradation with 10-bit signal processing
3. High quality motion adaptive I/P conversion for improved picture performance

Model name

- LMD-4250W
- LMD-2451W
- LMD-2050W
- LMD-1751W

Target applications

- BC (Studio/OBVAN/Master Control Room)
- Production Company (Editing)
- Location/Hire Companies
- Videographers/Prosumers
- Institutional/Corporate/Education

SONY PROF

TRIMASTER

1. Accurate Colour Reproduction
 - Colour Management System
 - Wide Colour Gamut
 - Digital Uniformity
2. Precision Imaging
 - High Resolution & High Colour
 - High Motion Picture Processing
 - Accurate Pixel Mapping
3. Quality Picture Consistency
 - Accurate Signal Processing
 - Precise Calibration System
 - Colour Feedback System

Model name

- BVM-L231
- BVM-L170
- PVM-L2300

Target applications

- BC (Studio/OBVAN/Master Control Room)
- Production Company (Editing)
- High-end Post Production & Cinema applications

New Trademark "TRIMASTER"

TRIMASTER is the Mastering Technology, which ensure three key element for professional Monitors, as **Accurate colour** reproduction, **Precision Imaging** and Quality **Picture Consistency**.

Accurate Color Reproduction

- No-linear Cubic Conversion
- High-purity LED
- Digital Uniformity

TRIMASTER
BVM-L230

Precision Imaging

- Full HD & 10 bit Panel
- 120Hz drive & Black Frame Insertion
- New I/P conversion
- Interface Display Mode

Quality Picture Consistency

- Professional Display Engine with 12 bit accuracy
- Precise Calibration System
- Color Feedback System

SONY PROFESSIONAL

SONY

Master LCD

BVM-L230

- First Reference 23-inch Full HD Master monitor on the market
- Superior SD and HD picture performance with low video delay
- Ultimate accuracy in colour and picture uniformity
- Extended colour gamut for Cinema applications
- S-Log gamma for CineAlta camera
- Enhanced production features
 - Picture & Picture various display mode
 - HD frame capture on memory stick
 - Pixel zoom
 - Gamut error
- No picture distortion and less adjustments required.
- Target applications
 - High-end post production
 - Colour grading
 - Program/Preview
 - Engineering
 - Reference image control

Over 1,000 units sold world wide!

Master LCD

BVM-L231

- Same features as the BVM-L230 (Ver 1.3) plus:
 - 3G SDI
 - Supported by BKM-250TG (3G SDI, Audio Level Meter, VITC)
 - Black Frame Insertion by Backlight Blinking
 - HDMI input
 - Others
 - Color Gamut, User LUT and Marker Preset assignable by CH
 - Availability: July 2009
 - Price: Same as BVM-L230

*** BVM-L230 cannot be upgraded to support Backlight Blinking and HDMI.**

SONY PROFESSIONAL

SONY

Master LCD

BVM-L231

- Top 5 FAB

Feature	Advantage	Benefit
1. TRIMASTER technology	Precise colour, gamma and picture consistency	Ultimate picture quality and consistency
2. Precision LED backlight system	Expand colour gamut near DCI (P3)	Expand scope of applications
3. Sony unique Display Engine	High accuracy and low video delay	The most precise and lowest video delay monitor in the market!
4. Black frame insertion and interlace mode	Backlight scanning technology allows maintaining good black level and motion blur reduction	Better blacks with less Blur, true Interlace reproduction
5. HDMI input	Future proof connection	For HDV or Blu Ray authoring system

TRIMASTER

Master LCD

BVM-L170

- 17 inch version of the BVM L230
- Full 1920 x 1080 resolution 10 bit panel
- LED blinking backlight
- Same feature set as BVM L230
- 4 input slots
- Includes both DVI & HDMI input
- Rack mountable (rack kit standard)
- 3G ready*
- Availability: Now
- EU List Price: €12k

*needs BKM-250TG

SONY PROFESSIONAL

SONY

Master LCD

BVM-L170

■ Product Concept

- 17" LCD Master Monitor
- Successor of the BVM-A20/A14
- Rack mountable
- Field usable

■ Main Features

- 17" Full HD(1920 x1080) LCD Panel
 - 10bit panel
 - High frame rate (96/100/120 Hz)
- Precision Backlight System
- Professional Display Engine
 - Nonlinear Cubic Conversion color management system
 - High-accurate I/P conversion
- 19" rack mountable (6U Height)
- DC operation available
- BKM-39H (Controller attachment stand) is available as an optional accessory

Master LCD

BVM-L170

- Differences from BVM-L230
 - **Backlight Blinking** is newly adopted instead of Black Frame Insertion by panel
 - Backlight Blinking allows removing motion blur, while keeping the same black level
 - **HDMI input** is added on top of DVI-D terminal
 - Native panel resolution is **1920 x1080**
 - WUXGA(1920x1200), UXGA(1600x1200) signals are not accepted via DVI-D
- Target Applications
 - Camera & VTR Control, On location shooting, Engineering, R&D, etc.

Master LCD

BVM-L170

■ Comparison between BVM-L230 (Summary)

	BVM-L170	BVM-L230
Screen Size	16.52 inch 365.75(H) x 205.74(V)mm	22.5 inch 483.84(H) x 302.4(V)mm
Resolution	1920 x1080	1920 x1200
Standard Brightness	100 cd/m2	100 cd/m2
Max. Brightness @100% signal	250 cd/m2	250 cd/m2
Black Frame Insertion	Backlight Blinking	Black Frame Insertion by Panel
Weight	15 kg (Tentative)	22.5 kg
Dimensions	W: 426 x H: 265 (6U) x D: 280 mm (Tentative)	W: 565.5 x H: 436.4 x D: 243.1 mm
Rack Mount	Yes (6U)	No
Wall Mount	No	VESA 200 x100 mm
DC IN	DC 24V	No
HDMI	Yes	No

Master LCD

BVM-L170

- Top 5 FAB

Feature	Advantage	Benefit
1. TRIMASTER technology	Precise colour, gamma and picture consistency	Ultimate picture quality and consistency
2. Precision LED backlight system	Expand colour gamut near DCI (P3)	Expanding scope of application range.
3. Sony unique Display Engine	High accuracy and low video delay	The most precise and lowest video delay monitor in the market
4. Black frame insertion and interlace mode	Backlight scanning technology allows maintaining good black level and motion blur reduction	Better blacks with less Blur, true Interlace reproduction
5. HDMI input	Future proof connection	For HDV or Blu Ray authoring system
6. 24V DC power	Less electrocution risk	For on locations shooting
7. 19-inch rack mounting	Fits inside rack, easy connection of video inputs at rear	Ideal for Mobile video productions or in engineering racks

SONY PROFESSIONAL

SONY

Master LCD

BVM new Software!

- New software coming in June
 - V1.4 for BVM-L230
 - V1.1 for BVM-L170
- Allows new functions for L170 & L230
 - Assign color gamut to input config
 - Assign user LUTs to input config
 - Assign markers to input config
 - Adds audio level meter*
 - Adds VITC reader*
- Availability: TBC

*needs BKM-250TG

TRIMASTER

Broadcast LCD

PVM-L2300

- Product concept
 - Control Monitor with TRIMASTER concept
 - Optimized for Broadcast applications
- Similar LCD panel and display engine as BVM-L230
- The backlight has been changed to wide CCFL (Cold Cathode Fluorescent)
- Broadcast standards colour gamut
 - SMPTE C, EBU and ITU-R BT709
- Side by side display mode only
 - blending, wipe, & butterfly N/A
- Uses same option cards as BVM-L230
- 3G ready*
- Cost effective version of BVM L230
- Availability: Now
- EU List Price €10k

SONY PROFESSIONAL

SONY

*needs BKM-250TG

Broadcast LCD

PVM-L2300

- Main Features

- 23" Full HD(1920 x1200) LCD Panel
 - 10bit panel
 - High frame rate (96/100/120 Hz)
- Wide Gamut CCFL Backlight
- Professional Display Engine
 - Non linear Cubic Conversion color management system
 - High-accurate I/P conversion
- Inheriting most of the main features of BVM-L230
- BKM-23M (Protection Panel) and BKM-38H (Controller attachment stand) is available as an optional accessory

Broadcast LCD

PVM-L2300

- Price and features are optimized for broadcast and critical picture monitoring
- Wide Gamut CCFL backlight is adopted instead of LED backlight
- HDMI input supporting will be added on top of DVI-D terminal

	PVM-L2300	BVM-L230

- Top 5 FAB

Feature	Advantage	Benefit
1. QFHD (3840x2160) pixels	4 times Full HD resolution	Ultimate picture resolution for top-end Contents Creation and industrial tasks
2. TRIMASTER technology	Aiming to be a reference monitor for the 4K CC market	Precise colour, gamma and picture consistency
3. The same Professional Display Engine as BVM-L230	Already mature technology	Reliable and consistent line-up with BVM series
4. Superb uniformity and stable pictures	Ultimate picture quality	Confidence in picture reproduction
5. Precision LED backlight system	Expand colour gamut near DCI (P3)	Expanding scope of applications.

SONY PROFESSIONAL

SONY

3G BKM Interface

BKM-250TG

- 3G monitor input
 - supports SMPTE 425 level B
- Also supports HDSDI and SDI inputs
- VITC reader display
- Audio level metering
- Works with BVM/PVM-L and LMD-xx51W series
 - BVM L230 needs V1.4 software
 - BVM L170 & PVM L2300 need V1.1
- Allows dual link input using one card
- Introduction: July 2009

SONY PROFESSIONAL

SONY

Technologies for 3G

3G-SDI

- Double Transmission Rate of the Current HD-SDI 1.5G bps
- 1920 x 1080p50 Progressive Signal through one Cable
- 10bit/12bit RGB (DVI→8bit)
- Over 50m (DVI→max10m)
- 3D Display (Frame Synchronized Mode/Micro Polarizer/3D Glasses)
